Without derogating from the generality of the foregoing, all Residential Portions must store their refuse in refuse bins fitted with baboon proof locks to protect the bin from access by primates or any other animal on refuse removal day. Split pins work well as secure lock mechanisms as baboons appear unable to fathom these devices.

In addition, it is advisable that Members install cages for refuse bins on their Residential Portions to ensure that large male baboons are not able to break into them. All such cages must comply with the requirement of paragraph 10.3.3 of the Raptor's View Wildlife Estate Architectural Rules.

5.9.2 No bushes or established trees with a diameter of 10 (ten) centimetres or more at the trunk shall be removed provided that if branches are close to or in contact with thatch roofs, or insurance specifications require that they be cut, then they may be trimmed by the Member or a Contractor approved by the Board.

5.10 **Domestic Pets**

5.10.1 The Estate is a Wildlife estate. Domestic animals, feral animals and domesticated wild animals could interfere with, destroy and/or pass disease onto Wildlife on the Estate and disturb the ecosystem in the Estate. Moreover, hybridization between feral and domestic animals and Wildlife causes undesirable gene flow that threatens the existence of rare species.

5.10.2 No domestic animals, feral animals or domesticated wild animals, whether caged or not, are permitted on the Estate.

5.10.3 The Board or the Estate Manager can require any Member by written notice to remove any animal brought onto the Estate within 14 (fourteen) calendar days. If such Member fails and/or refuses and/or neglects to remove the animal from

the Estate with the aforesaid period, then the Board or the Estate Manager can remove or procure the removal of the animal from the Estate in which event the Member shall be liable for all costs of removing and accommodating the animal and for a fine determined by the Board.

No motorised generators or power plants may be used on the Estate, without the prior written consent of the Board. Where such consent is granted, such generators and power plants shall:

5.12.1 only be allowed in emergency situations when line power supply is not available for periods longer than 12 (twelve) hours;

5.12.2 not be used for construction or maintenance power unless specified in the aforesaid consent;

5.12.3 not be operated outside the hours of 06h30 to 20h00 on weekdays and 08h00 to 18h00 on weekends and public holidays;

5.12.4 not exceed a generating capacity of 5KVA; and

5.12.5 have their fuel stored in a safe environment with proper provision for fire precautions including a fire extinguisher, which in the sole discretion of the Board, is appropriate.

5.13 **Domestic Workers**

- 5.13.1 Domestic Workers shall be given access to the Estate through the relevant access protocols in place at the time of access.

6.4 Enforcement

6.4.1 Every Member and Resident must procure that his or her Visitors and Contractors adhere to security protocol. Formalities and rules relating to access by Visitors shall be determined by the Board from time to time.

6.4.2 Members and Residents note that the entire perimeter fencing serves as a deterrent and is not guaranteed to prevent a determined attempt at intrusion into the Estate.

6.5 Residents

6.5.1 Any Member who requires additional security in his Residential Portion shall be required to install his own security system, the type of which shall require the prior written approval of the Board. Members will only be permitted to install silent alarms.

6.5.2 All Residents on the Estate must register with the Association.
